

WARRANTY

XENERGO.COM LED LIGHTING MODULE

Xenergo.com warrants the Buyer that the LED Module is free from manufacturing defects in material and workmanship under appropriate use. All Xenergo.com LED Modules are supplied with a 24 month Warranty, unless an extended Warranty period is purchased, which begins at the date of purchase by Buyer.

Any warranty claims must be submitted together with the defective LED Module in the original packaging, using the printable "Claim Form" found at Xenergo.com/Ledstore, no later than within two months from discovery of the defect by the Buyer.

If a LED Module is deemed defective, Xenergo.com will provide repair, replacement or may opt to reimburse the purchase price if the other options are not feasible. The course of action taken will be at the discretion of Xenergo.com and dependent on the nature of the defect. No one is authorized to make any other warranties on behalf of Xenergo.com, or to modify this Warranty.

The Warranty is subject to the appropriate use of the LED Module and will be invalidated by inappropriate use, abuse, neglect, accident, including incorrect installation and unsuitable environmental conditions.

The Buyer can withdraw from the contract without giving reasons by making a statement in writing within fourteen days from the date of purchase. The returned LED Module can not carry any signs of use.

The warranty period can be extended at an additional fee during purchase. If you require any assistance with regards to our LED Module, please do not hesitate to contact us.
